
The *Bullnose* Line

A Pickup Truck for the Water

The Bullnose Line of Utility Landing Craft offers the solution to your marine maintenance problems: a large stable work platform riding on a modified Vee hull. The vessel is manufactured in lengths from 18' to 30', and beam can be as wide as 12'. Load capacity is high as 10,000 pounds. The 18-degree modified vee hull can punch through waves efficiently, and the step chines promote early planing while providing reserve buoyancy. The optional heated cabin provides shelter for crew in bad weather, allowing a commercial operator to dramatically extend your season. The optional bow ramp is wide enough to handle a small skid-steer loader, and the Bullnose can even be equipped for push-tug work with tow bitts and push-knees. We also offer a full range of propulsion options.

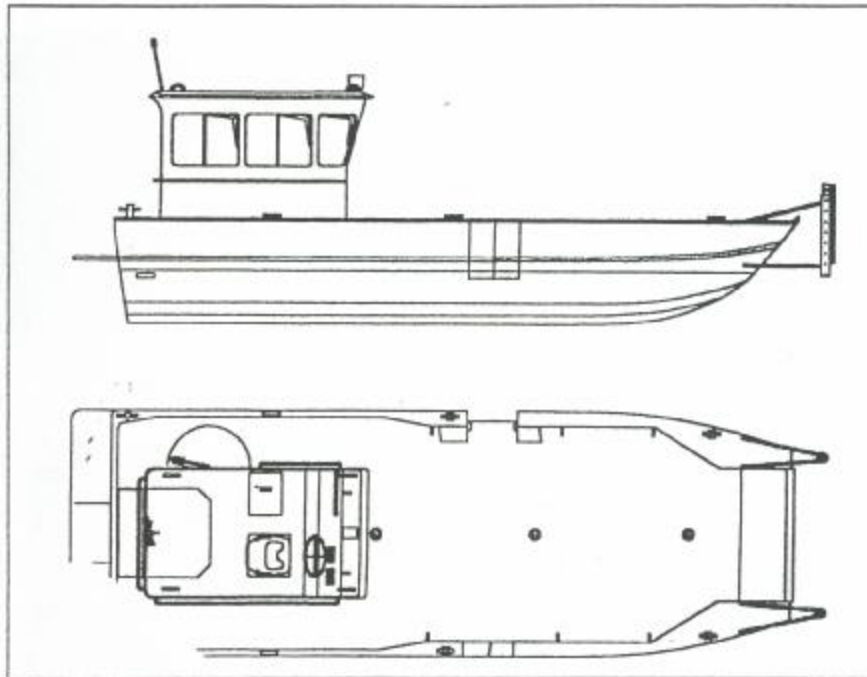

MetalCraft Marine

Builders of Fine Quality Aluminum Sport and Work Boats

- Custom Boat Design
- Refits and Dry-dock Service
- Manufacturing of Custom and Stock Lines
- Custom Aluminum Welding & Fitting

MetalCraft Marine is located on Kingston's inner harbour, manufacturing boats and providing services to the boating industry. Master Boat Builder, Thomas Wroe brings 20 years experience in design and construction to the business, ensuring the translation of your concept into an efficient, workable design.

The *Bullnose* Line of High Speed Barges
