# The CSR 43 Crew-Service-Response

## *The Ultimate Multi-Purpose Workboat*

We are pleased to present our newly launched CSR 43. This vessel, designed by MetalCraft Marine, is the latest model in our new-generation Crew-Service-Response line. The high-speed CSR 43 is a multi-purpose vessel, able to work as a crew boat, supply ship, or fast pollution response. Outfitted with twin Volvo-Penta TAMD 72WJ inboard diesels and Hamilton 321 waterjets, the vessel reached a top speed of 38 knots light (engines governed) and 32 knots fully loaded. The vessel is available with many propulsion options including conventional shafts and twin or triple outdrives. Equipped as a crew boat, it carries 25 passengers plus two crew.

One of the most attractive features of the design is the flexibility that can be offered to the operator. Using the proven Kingston design, the CSR can be equipped with a large aft deck for supply work, with a cabin for crew service, or with all necessary gear as a fast-response search & rescue or pollution response vessel.
