
KingFisher 20/22 Hardtop

A Workboat For All Seasons

The KingFisher line of workboats has proven to be a boon for companies and organizations who need a boat that handles tough conditions but still comes in an economical package. The KingFisher was designed for use in the frigid conditions of the Canadian Arctic. That testbed developed a solid sea boat which can handle grounding on a regular basis along with a little bit of ice breaking. Our hardtop models with portable enclosures are an extension of this working boat concept, enhancing the weather protection for the operator without compromising it's ability to work.

The vessel shown here was built for the U.S. National Parks Service for use by the Royal Canadian Mounted Police in the Arctic and by the Nigerian State Police in Africa. A major attractive feature of the KingFisher line is the versatility when it comes to interior layout and propulsion. It can be rigged with forward or aft hardtop, centre or side console, and with seating for up to fourteen passengers. With twin 60 hp outboards the boat planes quickly and cruises at more than 35 mph. This outdrive version tops out at 45, and some outboard versions have exceeded 70 mph. The KF is a proven boat for all seasons, and all conditions, from the Canadian Arctic to the Rio Grande.

MetalCraft Marine's Commercial Boat Division

With Our 10 Year Hull Warranty, We Believe There's No Better Boat!

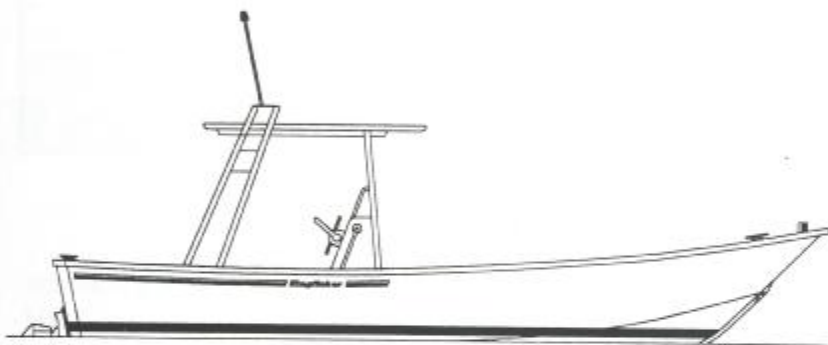

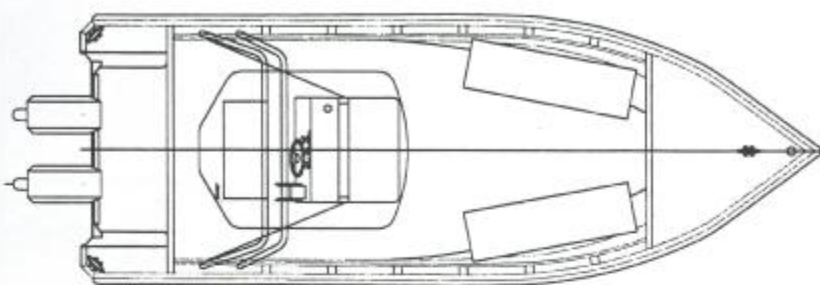

MetalCraft Marine

Builders of Fine Quality Aluminum Sport and Work Boats

- Custom Boat Design
- Refits and Dry-dock Service
- Manufacturing of Custom and Stock Lines
- Custom Aluminum Welding & Fitting

MetalCraft Marine is located on Kingston's inner harbour, manufacturing boats and providing services to the boating industry. Master Boat Builder, Thomas Wroe brings 20 years experience in design and construction to the business, ensuring the translation of your concept into an efficient, workable design.
