
KingFisher 22 Patrol

The Answer to Your Policing Needs

The KingFisher 22 Patrol can answer the needs of police departments who have water to patrol but don't have huge budgets. Based on the successful KingFisher 22 Skiff, which now forms a major part of the RCMP's Arctic fleet, the KF-22 Patrol adds an enclosed wheelhouse with full weather protection. As outfitted here for the Police Department of the City of Brockville in Canada the boat is powered with a Volvo-Penta I/O, but this hull has been successfully configured with single or twin outboards as well as inboard with waterjet.

MetalCraft's innovative construction methods provide an inexpensive platform with exceptional performance. The lighter, stronger hull allows high speeds with lower horsepower to weight ratio, thus providing propulsion savings and leaving you with more of your budget for necessary add-ons like radar, VHF, etc.; and most importantly, for patrolling the waterways in your community. The enclosed wheelhouse provides your officers with the protection they need, and the Kingfisher hull with full air or foam buoyancy gives a secure and stable working platform. This boat can truly answer your policing needs in sizes from 22' to 28'; please review our reference list for the many agencies using MetalCraft boats.
